

IN THE SPECIFICATION

Please replace paragraph [0019] with the following amended paragraph [0019]:

[0019] As shown in Figure 2, the dispense arm 28 may include a vertical piece 34, a horizontal piece 36, and a dispense head 38. The vertical piece 34 may be vertically attached to the base 20, and the horizontal piece 36 may be attached to the vertical piece 34 at a first end thereof so that it may translate transverse to the plane of the wafer chuck 22 and rotate over the wafer chuck 22. Although not shown in detail, the dispense arm may include a vertical actuator and a rotational actuator that are connected to the computer controller 16. The dispense head 38 may be attached to a second end of the horizontal piece 36, and as illustrated in Figure [[5b]] 6b, may include a plurality of nozzles 40 which may be directed substantially downwards. The nozzles 40 have include outlet openings at a lower end thereof through which a fluid, such as a liquid may be dispensed.
